

PERSONAL INFORMATION

Nationality: Turkish
Date of Birth: 16/05/2003

E-Mail : emiirhandemirci@gmail.com

Github:
<https://github.com/emiirhandemirci>

Linkedin :
<https://www.linkedin.com/in/emirhan-demirci-/>

Telefon : +90 530 429 66 96

Adres :Ankara/Çankaya

SKILLS

Languages: Python, SQL, Java, C++
Data Science & ML: Pandas, Scikit-learn, Logistic Regression, SVC, TF-IDF
Web Scraping & APIs: Scrapy, Selenium, REST APIs, API Analysis
Databases: PostgreSQL, MySQL, Database Design (Normalization, ER Diagrams)
Tools & Technologies: Git, GitHub, VS Code, Jupyter Notebook, Claude
Core Competencies: Object-Oriented Programming (OOP), Data Structures & Algorithms

LANGUAGES

English(B2)
German (A2)

MEMBERSHIPS

Atılım Yazılım Mühendisliği Topluluğu (ASES) Chair of the board

INTERESTS

AI tools, Technology news,
Football, Computer Games

EMIRHAN DEMIRCI

EDUCATION

2022 – Present Atılım University / Bachelor of Science in Software Engineering (100% English) GNO:3,24/4,00

EXPERIENCE

08.2025 – 09.2025 Agrimetre Teknoloji A.Ş., Software Engineering Intern

- Machine Learning (ML):** Developed and implemented classification models (SVC, Logistic Regression, SGD Classifier) to accurately predict product categories, brands, and types from raw product names.
- Data Preprocessing:** Managed end-to-end data cleaning and preparation pipelines using Pandas and scikit-learn; utilized TF-IDF techniques for text vectorization and feature extraction.
- Web Scraping:** Engineered automated data extraction bots using Scrapy and Selenium to harvest large-scale datasets from platforms like Gübretaş Bahçem and Hakmar Express.
- API Analysis & Optimization:** Analyzed internal/hidden APIs of dynamic websites to bypass traditional scraping limitations, resulting in faster and more reliable data retrieval processes.

PROJECTS

Hakmar Express Web Scraper | Python, Scrapy, Selenium

- Advanced Data Extraction:** Developed a high-performance Scrapy-based crawler implementing recursive leaf-node scanning logic to ensure data integrity across complex category hierarchies.
- Data Pipelines & Deduplication:** Built custom asynchronous pipelines for real-time product deduplication and data normalization (float conversion, URL standardization).
- Heuristic Field Recovery:** Engineered a smart "fallback" mechanism to recover missing metadata by analyzing H1 tags, breadcrumbs, and Schema.org snippets, significantly increasing data accuracy.
- Performance Optimization:** Configured AutoThrottle and concurrent request management to ensure efficient scraping while respecting website robots.txt and rate limits.

LEADERSHIP & ACTIVITIES

Atılım Software Engineering Society (ASES) | Ankara, Turkey
President | 2024 – Present

- Event Leadership:** Spearheaded the planning and execution of 12+ large-scale technical events, workshops, and networking summits.

Atılım University – International Student Office | Ankara, Turkey
International Student Assistant | 2024 – 2025

- Mentorship:** Provided academic and social mentorship to international students, facilitating their integration into the university environment.
